- Experience with disability management, incident investigation, workplace inspections, and job hazard analysis
- Strong interpersonal, relationship building, and internal partner coaching skills
- Strong presentation and facilitation skills
- Excellent attention to detail and a high degree of accuracy
- Demonstrated ability to provide beneficial recommendations to solve safety issues related to regulations, laws, and policies
- Able to interpret and implement company policies and procedures
- Effective oral and written communication skills
- Able to deal with people sensitively, tactfully, diplomatically, and professionally at all times
- Proven ability to maintain the confidentiality of information and records
- Strong analytical, organizational, and problem-solving skills
- Proactive in ensuring job knowledge is current
- Computer literacy, including intermediate to advanced skills in Microsoft Word, Excel, PowerPoint, and Outlook

EDUCATION & EXPERIENCE

- 1 – 3 years' experience in safety management in the commercial/institutional construction industry
- Post-secondary degree or diploma in Occupational Health and Safety considered an asset
- National Construction Safety Officer (NCSO), or working toward certification
- Intermediate First Aid certified and maintained

- Valid driver's license

FUNCTIONAL RESPONSIBILITIES

- Assist the Safety Manager in developing health and safety plans for the company based on a full review of health and safety-related needs (assessment of hazards, analysis of database, audits, changing legislation, and best practices) as required by the Ministry of Labour
- Advise, assist, and coach internal partners, managers, and subcontractors on the interpretation and administration of policies, programs, and best practices
- Review subcontractor safety programs and performance to ensure alignment with company standards
- Create and review all safety documents, manuals, policies, and procedures regularly to ensure regulatory compliance
- Collaborate with project team to develop project-specific safety plans to ensure project-specific hazards are identified as well as client-specific requirements are met
- Assist the project team and/or management with incident and near-miss investigations on their projects or in the office
- Collect and analyze safety performance data, including incident rates, near-miss trends, and audit findings, to identify improvement opportunities
- Ensure equipment is inspected as per regulation and is in alignment with those standards
- Assist the Safety Manager with training requirements, maintenance of records relating to health and safety-related training, and assist in the development and rollout of programs
- Assist with internal/external audits and act on recommendations
- Facilitate and enhance the JEN COL safety culture
- Perform regular worksite inspections, assessments, and audits
- Attend and assist with safety meetings as necessary

WORKING CONDITIONS

- Field and Office atmosphere (hazards associated with the construction industry)
- Manual dexterity required to operate computer and peripherals
- Periodic driving of a company vehicle
- Travel to job sites across western Canada
